Get digitally started through the COVID-19 caused crisis with the software portfolio of prisma informatik

With its various cloud offers, prisma informatik proves to be a strong partner in times of digitalization and modern work.

prisma informatik GmbH offers a wide range of business software for various business areas, which offer high added value, especially when used in combination, and thus also support work at home and in times of crisis.

Nuremberg, July 8th, 2020 - The current situation in times of the coronavirus crisis has shown the business world that working in the cloud in the sense of a modern workplace is more in demand than ever and will continue to gain in relevance in the future. Many companies are still facing major challenges in these areas - even though digitalization has been paving the way to the cloud for years.

Safely through the crisis with the prisma informatik portfolio
prisma informatik GmbH, with its wide range of cloud-based software solutions, is a competent partner for getting started with the cloud and proves that software projects can be successfully mastered despite the coronavirus pandemic.

Dynamics 365 Business Central provides optimal support working at home, for example. The central, comprehensive ERP solution for business management can be used anywhere thanks to its modern deployment options via web and app client - whether on the desktop, laptop, tablet or smartphone. This means that critical business processes, for example in the areas of financial accounting, merchandise management or sales, can be handled securely and smoothly from any location, even in times of crisis.

In order to maintain the best possible overview of all business data at all times and to be able to make well-founded decisions, Qlik Sense's powerful Business Intelligence functions can also be used to benefit.

Through integration with Dynamics 365 Business Central, real-time data from the ERP system can be accessed for analysis.

Using the DocuWare document management system enables to archive and manage documents and records (e.g. incoming invoices) in compliance with legal requirements from any location and at any time. In addition, by setting up digital workflows, business processes and workflows can be automated and simplified with DocuWare. Using the certified interface "Dynamics to DocuWare" from prisma informatik, document archiving is possible directly from Business Central.

Combined software deployment for more efficiency

With the combined use of the various cloud offers from prisma informatik, teams from each department will work together more closely and efficiently in the future, even if the individual employees are located in different places.

Professional way into the cloud

prisma informatik also supports its customers on their way into the cloud. In a "Cloud Readiness Workshop" companies are professionally prepared for the changeover with Microsoft Dynamics 365 Business Central within two days. The individual requirements are analyzed and a robust decision template with licensing and cost planning for the implementation is planned.
