

## BC Suite

designed for Qlik

Flexible reporting and analyzing solution for Microsoft Dynamics 365 Business Central

### Qlik product family

As one of the world's leading BI platforms, the Qlik product family offers users boundless possibilities for analyzing and visualizing business data. Unlike traditional solutions, Qlik products are user-controlled and intuitive. Qlik Sense is a complete data analytics platform that sets the standard for a new generation of analytics. Alongside Microsoft Dynamics 365 Business Central and the Dynamics 365 product family, any desired applications and systems, such as SQL databases, other CRM systems, or even online shops, can be connected as data sources.

### Integration for Qlik Sense and Business Central

As a Qlik partner, prisma informatik GmbH offers a convenient and efficient solution for the integration of both systems, especially for Dynamics 365 Business Central. The **BC Suite** was developed specifically for data preparation and the connection to Qlik solutions and offers many additional functions. The connection of the cloud-based application Qlik Sense to Business Central can be easily realized with **BC Suite**.

With **BC Suite**, our customers do not need far-reaching knowledge of the Qlik products, nor does the IT department need to provide elaborate and costly support in the ETL process.

### BC Suite - Your Advantages

- Comfortable script creation and simple data modelling from the respective ERP environment
- Integrated Best-Practice-Templates for generating own analyses in a short time
- Direct and interactive integration of any desired Qlik Sense objects into the interface of Business Central
- Expanded analysis possibilities, process controlling in realtime
- Multiple data source administration
- Cloud solution

## BC Suite designed for Qlik - how does it work?

The **BC Suite** features a **Script Generator** to automatically generate the required scripts for data modeling. The **Grouping Function** enables the ERP data to be restructured for analysis purposes in any desired dimensions. With the various layout **Templates** already integrated in the **BC Suite**, users can work immediately with the interfaces tailored to their department or adjust and extend them according to their needs. Using **Dynamics 365 Integration**, Qlik Sense analyses can be integrated directly into the ERP system's interface.

### About prisma informatik GmbH

The prisma informatik GmbH, based in Nuremberg, uses the ERP software Microsoft Dynamics Business Central and Qlik Sense Business Intelligence solutions to plan, develop and manage future-orientated IT platforms for national and international medium-sized companies. Customers from a wide range of industries rely on our expert knowledge and experience in all phases of a project as well as daily operations.
