NAVdiscovery

Flexible reporting and analyzing solution for Microsoft Dynamics

Qlik product family

As one of the world's leading BI platforms, the Qlik product family offers users boundless possibilities for analyzing and visualizing business data. Unlike traditional solutions, Qlik products are user-controlled and intuitive. Users can create new queries and analyses at any time without having to involve the IT department. Besides supporting custom analyses, they provide traditional standard reports and queries. Alongside Microsoft Dynamics NAV (now Business Central) and Microsoft CRM, any desired applications and systems, such as SQL databases, other CRM systems, or even online shops, can be connected as data sources.

Integration for QlikView, Qlik Sense and Microsoft Dynamics NAV

As a Qlik Solution Provider prisma informatik has developed **NAVdiscovery** specifically for users of Microsoft Dynamics NAV and Qlik products. The solution minimizes the preliminary technical work required to integrate the systems, automates script creation and offers numerous other features, such as the integrated Grouping Function. **NAVdiscovery** is also able to connect Dynamics CRM and other data sources to the Qlik solutions.

NAVdiscovery - Advantages

- Comfortable script creation and simple data modelling from the respective ERP environment

- Integrated Best-Practice-Templates for generating own analyses in a short time

- Direct and interactive integration of any desired QlikView oder Qlik Sense objects into the interface of any Microsoft Dynamics NAV or CRM page

- Expanded analysis possibilites, process controlling in realtime

- Multiple data source administration

- Certified solution

About prisma informatik

The prisma informatik GmbH uses the ERP software Microsoft Dynamics and the Qlik Business Intelligence solutions to plan, develop and manage future-orientated IT platforms for national and international companies. Our know-how on both sides helps you to achieve valuable results quickly and efficiently.

Certified solution

NAVdiscovery is a special solution certified for Microsoft Dynamics NAV (CfMD). The architecture of the Toolbox allows for conflict-free integration into the respective ERP environment. Our customers are thus able to implement Qlik products into their software environment within a very short time.
